# hogs and pigs

MARCH 1971 (10 Corn Belt States)

Release:  
March 22, 1971  
3:00 P. M. EST

Hogs and pigs on farms on March 1, 1971 in the 10 Corn Belt States are estimated at 44.0 million head--9 percent more than a year earlier, according to the Crop Reporting Board. Hogs kept for breeding are estimated at 6.9 million head, down 7 percent from last year. Market hogs totaled 37.1 million, up 13 percent from a year ago. The 10 States included in this report are Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska and Kansas.

The December-February 1971 pig crop is estimated at 13.7 million, up 1 percent from the same period a year earlier. Sows farrowing in this period totaled 1,983,000--up 5 percent from December-February 1970. The average number of pigs per litter was down 4 percent.

Hog producers in the 10 States intend to farrow 7 percent fewer sows during March-May 1971 and 15 percent fewer during June-August 1971 than in the same periods a year earlier.

## MARCH 1 HOGS AND PIGS INVENTORY 9 PERCENT ABOVE A YEAR AGO

All 10 States had larger total inventories on March 1 than a year earlier. The inventory estimate of all hogs and pigs at 44.0 million was up 9 percent from the March 1, 1970 and 1969 totals. Illinois had the smallest increase of 4 percent while Indiana, Wisconsin, Minnesota and Kansas each increased 14 percent. Iowa hog producers had 9 percent more hogs on hand than a year earlier. Hogs kept for breeding were down in all States but market hogs were up in all States.

Market hogs in the 10 States are estimated at 37.1 million, up 13 percent from a year earlier. All weight groups were above last year, however the greatest increases were in the heavier hogs. By weight groups, the estimates and increases from March 1, 1970 are as follows: Under 60 pounds--13,010,000, 392,000 head; 60-119 pounds--8,032,000, 932,000 head; 120-179 pounds--9,383,000, 1,701,000 head; 180-219 pounds--5,562,000, 1,141,000 head; and 220 pounds and over--1,087,000, 157,000 head.

NOTE: Quarterly Hog and Pig Estimates for Hawaii are no longer carried in this report. In the future, estimates for Hawaii will be on a semi-annual basis and published in the June and December reports.

## DECEMBER-FEBRUARY PIG CROP

More sows farrowed during December-February in all 10 States than a year earlier. However, the average number of pigs saved per litter was down in all States except Illinois which was the same. The decrease in pigs per litter was attributed mostly to more severe winter weather than a year ago. The 10 State average pigs per litter was 6.93 for 1971 compared with 7.22 pigs a year earlier.

## MARCH-MAY FARROWING INTENTIONS

Hog producers in the 10 States intend to farrow 7 percent fewer sows during March-May than a year ago. All 10 States expect to farrow fewer sows except Kansas which expects the same number as last year. Wisconsin, Nebraska and Iowa expect to farrow 10 percent fewer sows during this period, which is the sharpest decline reported by any State.

## JUNE-AUGUST FARROWING INTENTIONS

First intentions estimated for the June-August quarter show a 15 percent decline from the comparable period last year. All 10 States expect declines ranging from 7 to 20 percent. If these intentions are realized, the number of sows farrowed during this period would be 2,159,000 head.
